Ensure safe web browsing with customizable filtering and features for safe Web 2.0 access

Regulations, policies, safety, and security all make an Internet filter essential in schools. But over-blocking limits the potential of the Web to promote participatory learning and acquisition of 21st-century skills. Web access management needs to do more than filter inappropriate content—it needs to balance educational Web 2.0 use with network security and student safety.

**Lightspeed Web Access Manager** provides an intelligent solution for web filtering—offering features for customization, granular policy control, safe Web 2.0 access, and mobile filtering—to ensure that inappropriate sites are no longer a click away, but that valuable content remains available to users.

**FEATURES**

- **Comprehensive and accurate** URL database with more than one billion entries grouped into education-specific categories.
- **Multiple layers of anonymous proxy detection** and blocking to keep users from bypassing your filter and accessing blocked sites.
- **netTrekker d.i. integration** to ensure seamless access to approved netTrekker sites.
- **Protection for school computers outside the network**—without a VPN, from any location, with any type of Internet connection—via the Guide Mobile Filter.
- **Flexible filtering for thin clients**, including NComputing, Citrix, and Windows Terminal Server.
- **Ability to create different policies** based on user, IP, group, organizational unit, domain.
- **Peer-to-peer application** and file-type blocking.
- **Integration with Student Information Systems** for comprehensive, individualized user information and custom reporting.
- **Daily signature updates**, and immediate emergency updates, directly from Lightspeed Systems.
- **Ability to accommodate even the heaviest traffic loads**, up to 1 GB of Internet bandwidth, without hindering performance.
- **Educational Video Library** allows teachers to share approved YouTube videos with students.
- **NEW! My Big Campus** offers safe access to Web 2.0 tools, including a Resource Library to post, view, and share online resources as well as a Collaboration site.

**BENEFITS**

- **Protects users from inappropriate material on the Internet**. Web Access Manager detects and/or blocks access to inappropriate material on the Internet based on our extensive, education-specific URL database, as well as your own custom allow and block lists.

**Keeps searches safe.** Web Access Manager ensures that search results on Google and other popular search engines do not include inappropriate sites or images, such as pornography and sexual content.

**Provides safe Web 2.0 access.** Web Access Manager promotes a balance between learning and security by offering safe, easily-managed ways to access Web 2.0 tools and resources, share online resources, and engage in participatory learning.

**Comprehensive, Customizable Reporting**

Web Access Manager gives you access to comprehensive information about who is viewing what over the Internet, so you can adjust Acceptable Use Policies, change allowed usages, review problems and troubleshoot issues, and plan for ongoing needs. You can see a high-level overview of content viewed and blocked, and then drill down for detailed information, with reports like:

- Blocked Content
- Search Engine Queries
- Blocked URLs
- URLs visited
- Traffic by Category
- Overrides (active and history)

Also available as the Lightspeed Rocket, Web Access Manager, an appliance-based solution for high-capacity networks.
## Network Solutions for Safe Online Learning

### Software solutions
Manage your school network with our all-in-one solution or its components:

### High-capacity network solutions
High-performance, scalable appliance-based school network solutions:

- **Lightspeed Rocket**
- Ensure safe web browsing on your high-capacity network with comprehensive, customizable filtering and features for safe Web 2.0 access.

- **Lightspeed Rocket**
- Efficiently block spam on your high-capacity network, while archiving and reporting on communications.

- **Lightspeed Rocket**
- Customize your high-capacity network solution with the addition of our other software products.

- **Lightspeed Rocket**
- Get a comprehensive, cost-saving solution for your high-capacity network by combining the two Rocket appliances with Security Manager, Network Traffic Manager, and Power Manager.

### About Lightspeed Systems
Lightspeed Systems Inc., founded in 2000, develops comprehensive network security and management solutions for the education market. We are committed to helping schools operate their networks effectively and efficiently, so educators can provide safe online teaching and learning environments.

### Exceptional Service and Support
Our unparalleled service and support mean our solutions will continue to deliver, long after their easy implementation. With any Lightspeed Systems solution, you can depend on:

- 24/7 live-person phone technical support.
- Comprehensive online knowledge bases.
- The Lightspeed Wiki, rife with user collaboration and product expertise.

### Professional Development & Training
Professional Services: We provide customized, collaborative professional development services to address your specific needs. For more information, please contact ps@lightspeedsystems.com

Training: To help you fully leverage your investment in Lightspeed Systems solutions, we offer an array of training options.

- Online introductory training and user demonstration videos.
- Administrator certification.
- Regional training throughout the U.S.
