

Antivirus

Block viruses, spyware, and malware with desktop and gateway security

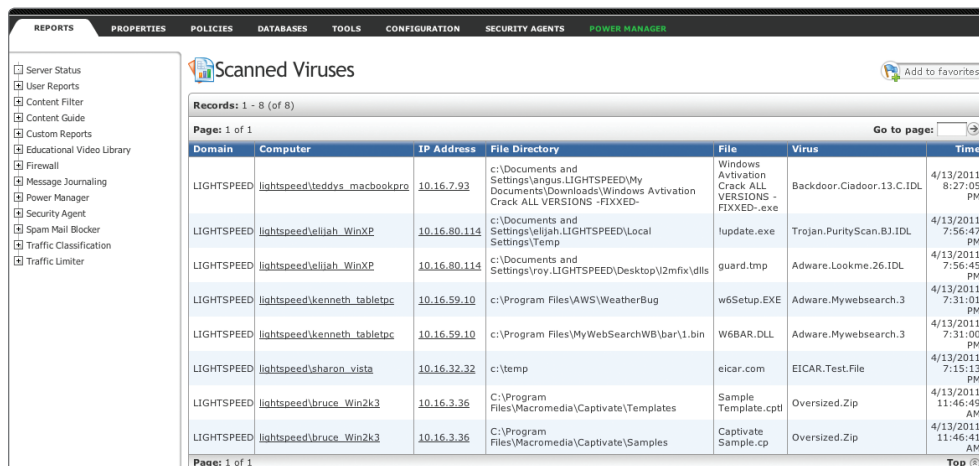

The number of viruses, spyware, and malware threats continues to grow; as does the time-consuming, costly damage they can do to your network. Lightspeed Antivirus protects your network against known and unknown threats coming through email, removable media, web sites, and more—so you can easily maintain the health, security, and availability of computers and resources across the network.

With Lightspeed Antivirus, you can:

- Block known threats with daily signature updates from the Lightspeed Systems comprehensive database.
- Block unknown threats with application integrity checking and registry monitoring.
- Disinfect severely infected machines and return them to a pre-infection state.
- Monitor and regulate inbound and outbound traffic based on preconfigured security policies.
- Review problems and troubleshoot issues with comprehensive reports about potentially dangerous activity.
- Easily manage hardware and software across your network with inventorying capabilities.
- Inventory hardware and software across your network.

FEATURES

- Comprehensive virus, spyware, and malware signature database with automatic daily updates.
- Removable media protection to ensure students and staff do not infect the network when bringing documents from their home computers.
- Polymorphic virus support to protect against complex, changing viruses.
- Program permissions to control what known and unknown programs can do on the network.
- Schedulable virus scans.
- Remote administration.
- Hardware and software inventorying.
- Hardware/software inventorying.
- Ability to block programs based on their categorization.
- Network address translation to mask the internal network structure from the outside world.
- Application-level proxies for most protocols to allow or deny specific commands at the gateway level.
- Scan-on-close real-time virus scanning to ensure an open file doesn't infect the network upon being saved.
- User resolution and reporting to monitor potentially dangerous users.
- Blocked application categories to stop the types of applications most likely to contain viruses.
- Maximum CPU% settings to control resources devoted to virus scans.
- Ability to show/hide antivirus notifications from end users.
- Cross-platform protection for Macs and PCs.
- Antivirus Strike Force for dedicated, rapid response to virus infections

In the **Scanned Viruses** report, discover which computers were threatened and by which virus.

Antivirus

Comprehensive, Customizable Reporting

Lightspeed Antivirus provides comprehensive information about viruses, spyware, and malware threatening your network. View a high-level overview of your network security, and then drill down for detailed information so you can review problems and troubleshoot issues with reports like:

- Blocked Unknown Programs
- Computers with Antivirus Agent
- Blocked Programs
- Blocked Viruses
- Programs Listening for Connections
- Unknown Programs Scan
- Viruses Scan

Identify unknown, and potentially dangerous, programs across your network.

"Lightspeed Antivirus caught things that our previous antivirus solution didn't. When something is suspicious, the product alerts me and either quarantines or deletes the file. We haven't had a single virus outbreak."

— David Calabrese,
Technology Director,
Memphis ISD

The Lightspeed Suite

Choose an all-in-one solution, or customize it to your needs:

- Web Filter
- Mobile Filter
- My Big Campus
- Hosted Email
- Educational Resource Library
- Hosted District Web Site
- Campus Collaboration Bundle
- Email Archiving
- Antivirus
- Spam Filter
- Advanced Web Traffic Reporting
- Power Management

About Lightspeed Systems

Since 1999, Lightspeed Systems has been partnering with IT staff in schools—making day-to-day tasks manageable and educational goals reachable. Today, our solutions are used in more than 2,000 school districts, allowing us to help transform education.
