

FEATURES

- **Tiered administration** lets you delegate tasks and authority.
- **Powerful, customizable reporting** gives you actionable information about your systems, and allows you to automatically run and distribute reports.
- **Easy implementation** gets you up and running quickly, while ease-of-use ensures that the solution delivers ongoing results without an additional burden on network staff.
- **More than fourteen proven lines of defense for blocking spam**, including application of your content rules, lists, adult subject-line scanning, Bayesian statistical analysis, and more.
- **Compliant email** archiving with controlled end-user access.
- **Comprehensive and accurate, education-specific URL filtering database** with more than one billion entries.
- **Advanced proxy detection** and blocking for better AUP enforcement.
- **Ability to accommodate even the heaviest traffic loads**, up to 1 GB of Internet bandwidth, without hindering performance.
- **Comprehensive virus database** with automatic updates.
- **Guide Mobile Filter** provides remote filtering and reporting on off-network activity
- **NEW! The Educational Video Library** allows teachers to share approved YouTube videos with students, providing access to valuable Web 2.0 learning resources without the content risks. Video approval can be delegated to teachers or curricular leaders, and teachers can tag, search, and review approved videos.

Monitor, manage, filter, and secure your school's network with a single solution

Total Traffic Control is the complete solution for managing your school network's usage, health, and security. With this comprehensive solution you can monitor user activity, ensure Acceptable Use Policies are being followed (on email, the Web, or the desktop—both on the network and off), reduce dangerous and costly security threats, ensure school resources are utilized safely and effectively, and easily view and share critical information with custom reports.

Total Traffic Control gives schools best-of-breed network management and security with a single, comprehensive solution that includes **Lightspeed Email Manager, Lightspeed Web Access Manager, Lightspeed Network Traffic Manager** and **Lightspeed Security Manager**.

Benefits

Helps you set and enforce Acceptable Use Policies. Total Traffic Control makes it easy to create rules for use of network computers, mail servers, and web browsing. It also provides comprehensive reporting to alert you to potential breaches to those policies, and helps you correct or amend rules.

Keeps your network running smoothly.

The performance of your network relies on access to network health and usage information. Total Traffic Control allows you to ensure the availability of critical services by giving you an easy-to-understand overview of network usage—and by providing you with the tools to manage traffic issues and bandwidth allocation.

Reduces exposure to inappropriate content.

With spam blocking, Internet content filtering, and virus protection, you can ensure that your users, and your network, aren't exposed to harmful content.

Blocks security breaches. A comprehensive database of viruses and malware detects known threats, while customizable program permissions allow you to stop even unknown threats—before they harm your network.

Allows you to conform to federal regulations.

Total Traffic Control blocks offensive or harmful web content, and archives all email, helping you effortlessly meet federal CIPA and e-discovery regulations.

Offers flexibility and customizability.

Total Traffic Control provides the protection your network needs—without impeding the benefits of 21st-century learning and efficient communication for which it was designed. Because every school is different, we give administrators the ability to adjust policies and databases on a granular level that ensures over-blocking and rigid restrictions don't hinder your users' ability to do their jobs effectively.

Comprehensive, Customizable Reporting

Total Traffic Control gives you access to comprehensive information about who, when, where, and how your network is being utilized, so you can adjust Acceptable Use Policies, change allowed usages, review problems and troubleshoot issues, and plan for ongoing needs. You can see high-level overviews, and then drill down for detailed information, with reports like:

- Busiest Protocols
- Top Network Users
- Blocked Content
- Search Engine Queries
- Mail Traffic Chart
- Traffic by Category
- Computers: Hardware
- Computers: System Information
- Computers: Software Inventory
- Instant Messaging

Exceptional Service and Support

Our feature-rich solutions designed specifically for schools are the answer to your network management and security needs. But our unparalleled service and support mean our solutions will continue to deliver, long after their easy implementation. With any Lightspeed Systems solution, you can depend on:

- 24/7 live-person phone technical support.
- Comprehensive online knowledge bases.
- The Lightspeed Wiki, rife with user collaboration and product expertise.

Professional Development and Training

Professional Services:

We provide customized, collaborative professional development services to address your specific needs. For more information, please contact: ps@lightspeedsystems.com

Training:

To help you fully leverage your investment in Lightspeed Systems solutions, we offer an array of training options.

- Online introductory training and user demonstration videos
- Administrator certification
- Regional training throughout the U.S.
