

Solutions for IT. Benefits for Everyone.

The Lightspeed Systems Suite gives K-12 schools a comprehensive solution for filtering, managing, securing, monitoring, and optimizing networks. We empower IT staff to give users access to the learning tools and opportunities they need to thrive in a Web 2.0 world.

Administrators

- Safely and effectively deliver the latest mobile, collaborative, and engaging technologies
- Assure users, staff, boards, and parents that policies for acceptable use are monitored and enforced
- Ensure compliance with CIPA and other regulations and minimize district liability
- Access reports on network use, with detailed information on individual users

IT Staff

- Simplify network management with a single, consolidated solution for filtering, security, archiving, management, monitoring and more
- Search and retrieve unalterable archived email
- Operate in an authenticated, monitored environment
- Provide tools for a safe collaborative learning environment
- Store unlimited files in the cloud to save on hardware costs and prevent virus spread

Teachers/Curriculum Director

- Access and share valuable resources easily: videos, web sites, documents, and more
- Filter education-specific URLs with our comprehensive and accurate database
- Extend the classroom with a safe, engaging online environment

Students

- Access blogging, messaging, discussions, online assignments, and more
- Engage in learning through collaboration with peers and teachers
- Work in an environment that mimics out-of-school use of the Internet

Parents

- Be assured that students are safe in a monitored, CIPA-compliant environment
- Know that students are working with the latest technology, ensuring future competitiveness
- View teacher web sites and see student assignments, calendars, and more
