

# Mobile Device Management

## Easily manage mobile devices distributed throughout your district

Mobile devices, blended learning, and 1:1 programs are increasingly the norm in schools, as they give students access to anytime/anywhere learning opportunities with a tool that keeps them engaged. But along with the benefits come some management challenges. And while IT is tasked with many aspects of the management, security, and maintenance of mobile devices, in the end it's educators who need to ensure that the devices are supporting learning goals and that students have the access and applications required for lessons and assignments.

Lightspeed Mobile Device Management makes it easy to manage devices distributed throughout your district and to maximize their educational benefits. Unique education-specific tools and policies split management between IT staff and classroom teachers, so everyone has the visibility and control they need, and no one is overburdened with management.

---

With the **Lightspeed Mobile Device Management**, you can:

**Make mobile device management easy**, keep mobile device use safe, and ensure mobile learning programs are effective.

**Give teachers the ability to roll out apps** to students and monitor student use.

**Inventory mobile devices** and their installed software.

**Manage updates and installs** from a central location.

**Quickly identify devices** that have violated AUPs.

### FEATURES

- Easy management interface
- Multiple levels of administration for IT staff and classroom teachers
- Inventory management and reporting
- Different profiles to control who can do what
- Ability to force authentication
- Restrictions on device and app use
- Remote configuration and device wiping
- iOS support; Android support coming soon
- Time-based policies to allow different in-school and after-school use

Integrated with the Lightspeed Campus Collaboration Bundle (including mobile filtering and the My Big Campus social learning platform), the Lightspeed MDM solution makes mobile learning safe while providing students with access to educational resources and collaboration and providing teachers with the ability to easily integrate devices into their lessons.

It's a complete solution for mobile learning, made just for K12.
